

MODEL: - 1

- Orange indicate training
- Blue indicate validation

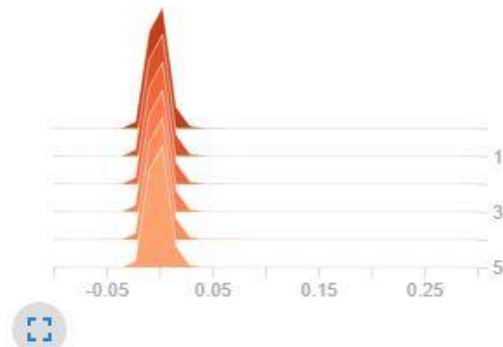

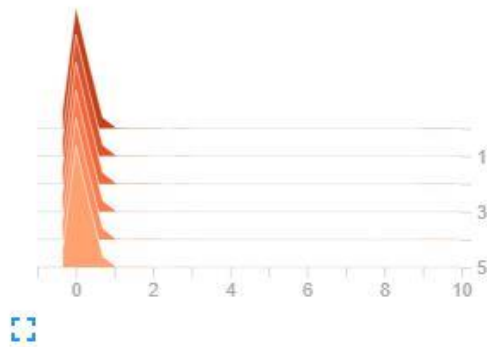

block5_conv3

block5_conv3/bias_0

train

block5_conv3/kernel_0

train

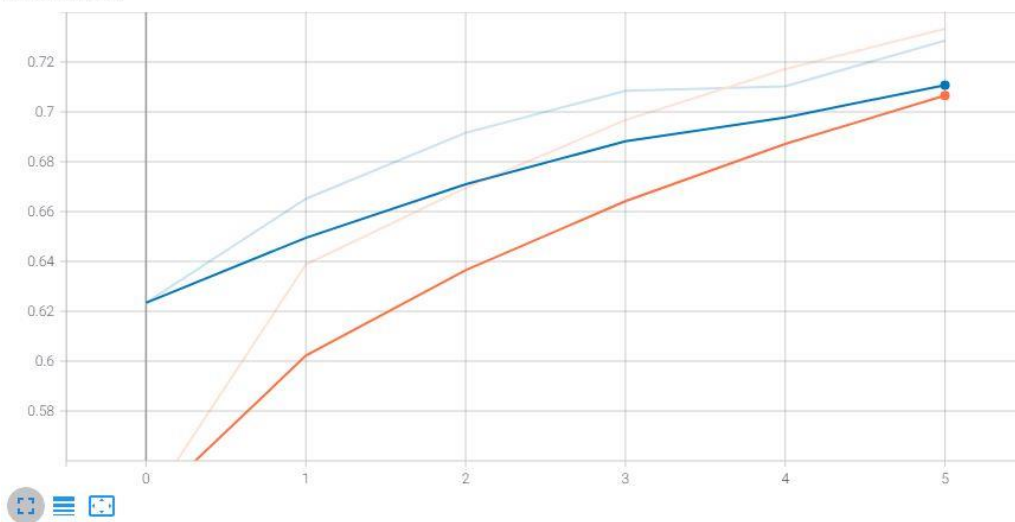

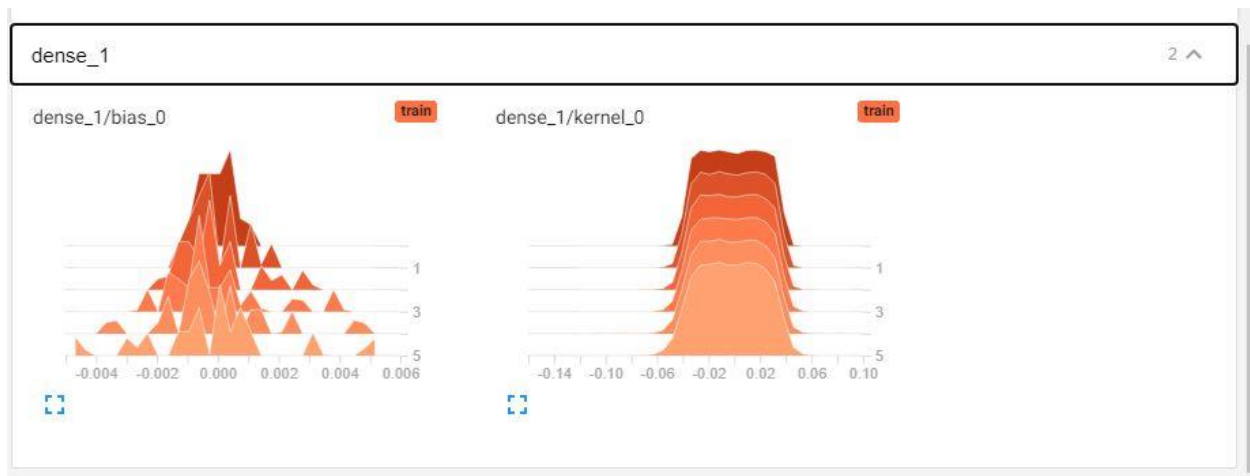

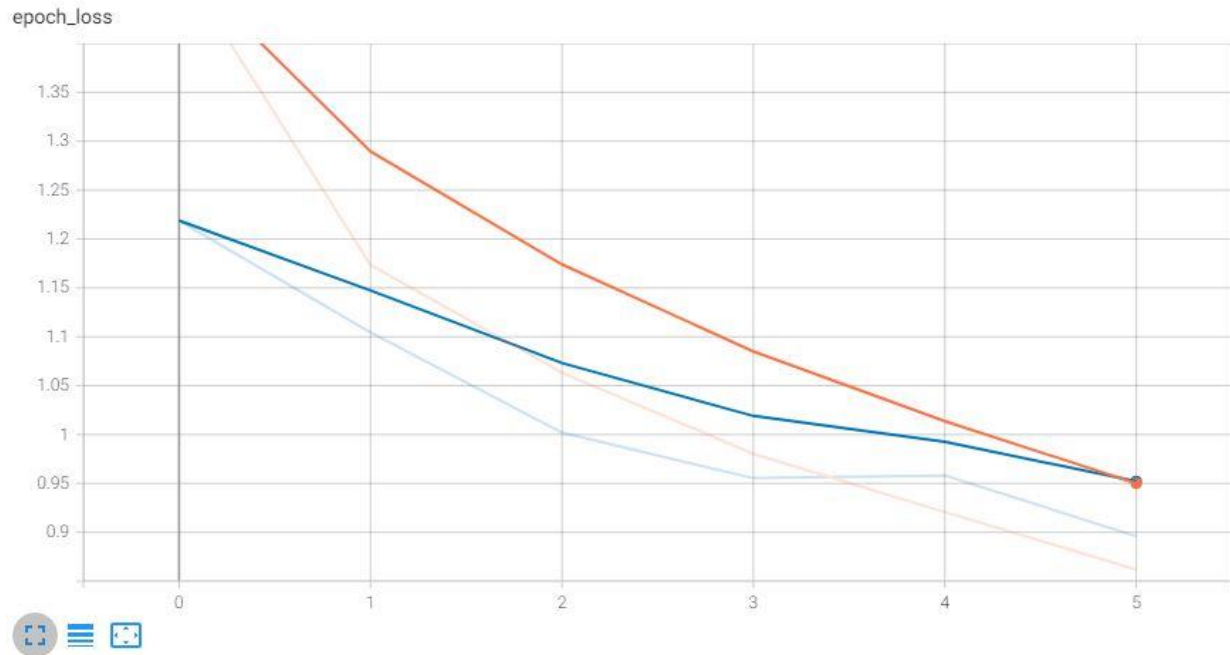

Observation:-

1. Training accuracy and validation accuracy starts gradually from first epoch and reach the highest accuracy after 6 epoch.

MODEL: - 2

epoch_accuracy

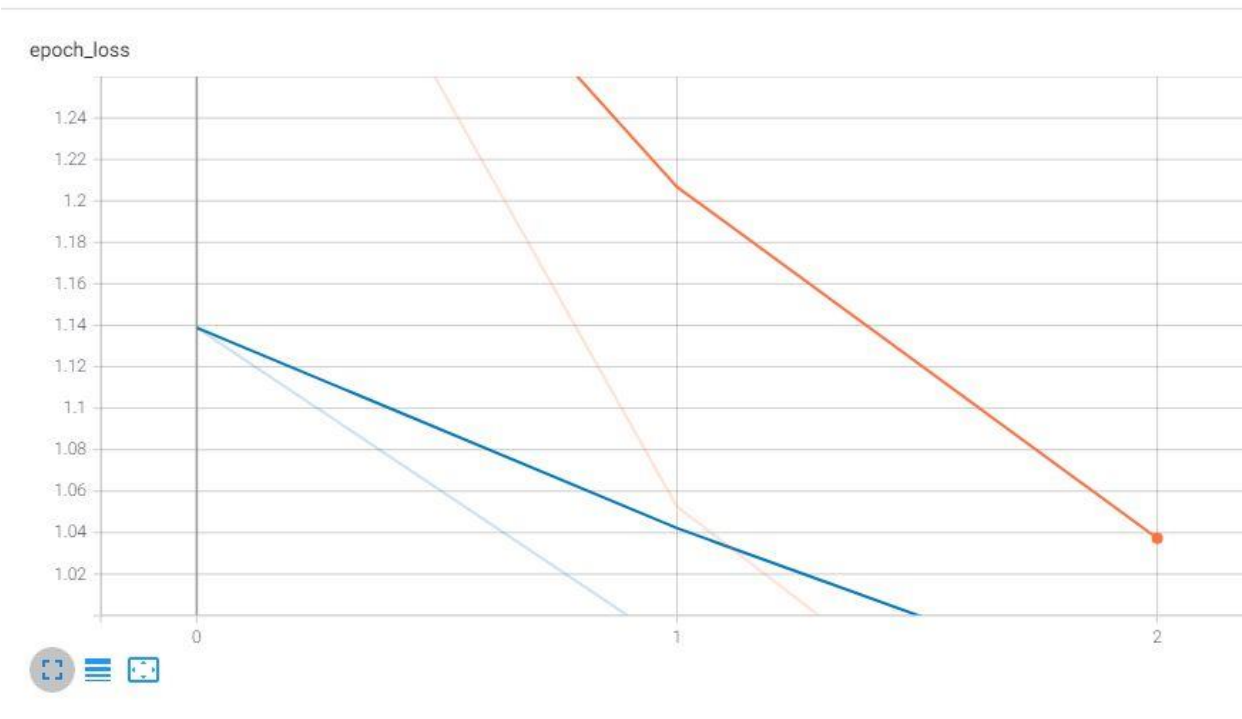

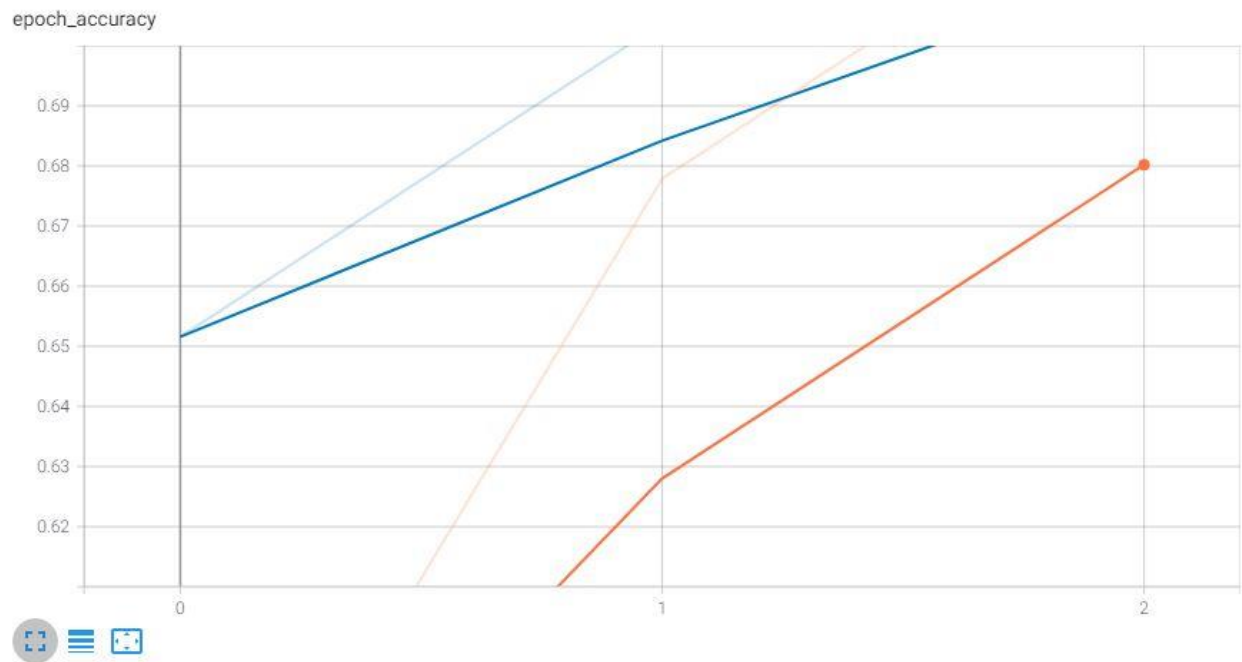

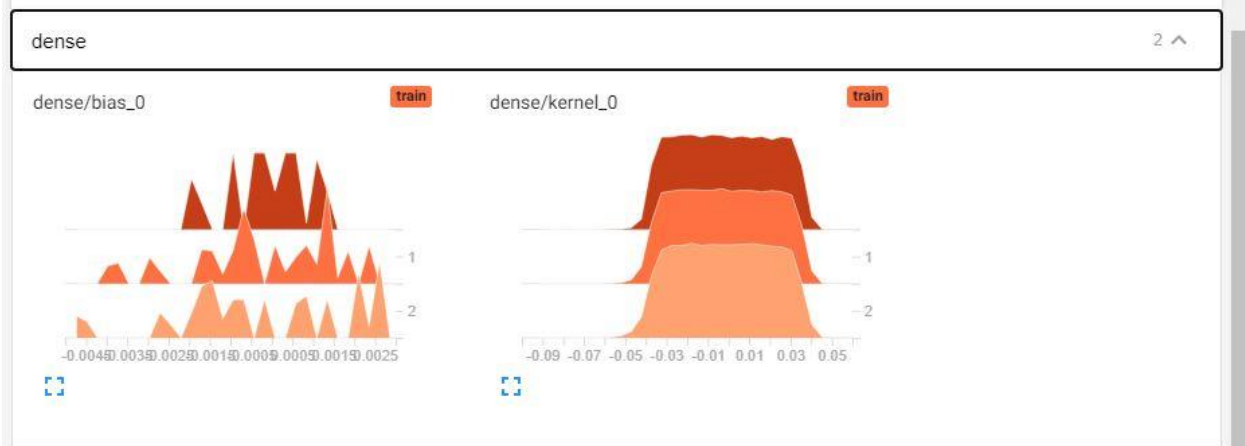

Observation:-

1. Training accuracy and validation accuracy starts gradually from first epoch and reach the highest accuracy after 5 epoch.

MODEL: - 3

Observation:-

1. Training accuracy and validation accuracy starts gradually from first epoch and reach the highest accuracy after 2 epoch.
